JoMash

JoMash is a self-service, no-code platform that enables you to embed Qlik Sense® analytics everywhere and create mashups easily.
Go beyond Qlik® standards and create customized mashups with easy-to-use widgets in your branded design and use JoMash to embed these great looking insights right where your users work.
JoMash can visualize your Qlik Sense® analytics seamlessly at the point of decision in your users workflow, making it redundant for your users to switch between several tools.

Embedded power
Embed analytics to empower your users to make data-driven decisions right where they work.

User experience
Serve your users with an intuitive and easy-to-use interface that removes all unnecessary complexity.

Cost-efficient self-service
Use our no-code platform with its drag & drop editor to build apps and dashboards in a flash.

What JoMash offers you
- A rich widget library: Expandable filter panel, dropdown lists, search fields, etc.
- Fully customizable in your corporate design
- Integration of multiple apps in one mashup
- Multilingualism
- ... and more!
